# eNETEmployer - Human Resource (HR)

Deal efficiently with personnel management issues by managing your organization's HR. Coordinate employee compensation, benefit entitlements, work leaves, employment equity, group insurance, staff evaluations, performance reviews, training programs and much more.

## Human Resource Module

The HR module helps you to deal efficiently with personnel management issues by managing every aspect of your organization's human resources.

Use the features to coordinate employee compensation, benefit entitlements, staff leaves, employment equity, group insurance, employee evaluations, performance reviews and more.

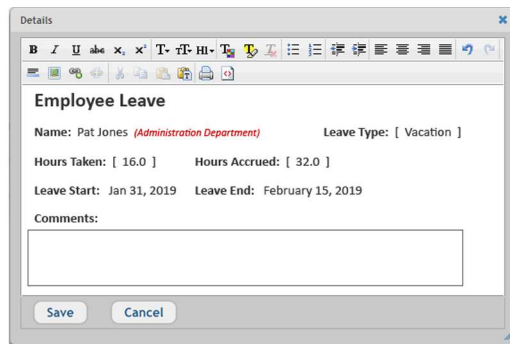

The multi-user technology allows for authorized personnel to administer HR functions securely over the Internet. Employee data is available 24/7 and easy to maintain by the company, by your managers and even by your employees.

## Custom HR Events and Tasks

Manage all types of incidents and workplace events including employee reviews, accidents, labour grievances, skill reviews, absence management, company equipment, employee training courses, and more.

Include detailed incident account including the dates that an incident occurred, the personnel involved and any ongoing and followup actions.

Use the Document Storage feature to include detailed documents, PDFs and attachments for all incidents and events.

Freeform data fields allow you to fully customize each incident and event to suit your workflow.

## Training Course Management

Create custom questionnaires and quizzes for your company training courses, and then assign courses to individuals or groups of employees.

When employees take the course, their score will be submitted to your HR team or manager.
