Cloud-Based Payroll Processing

eNETEmployer - Full-Featured Payroll Processing

The payroll module allows you to effectively manage your employee payroll processing including salaries, wages, bonuses, and source deductions. Whether simple or complex, eNETEmployer will make the employee payment process faster and more effective.

Payroll Module

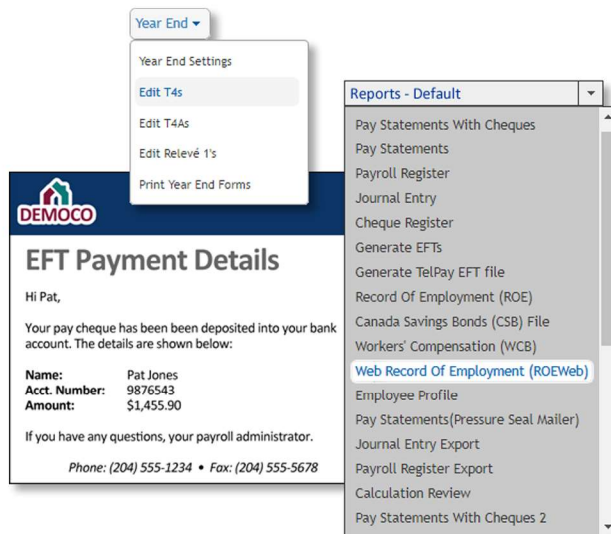

eNETEmployer includes all of the features you need to process your payroll from start to finish including unlimited deductions and benefits, employees, interim payroll processing, extra or additional payroll runs, printed cheque or email pay statements, employee self-service, customized reporting and much more.

Use the familiar spreadsheet-like layout to edit data in place, re-order columns, and sort / filter as needed. Advanced formatting options improve screen readability on all devices and makes it easy to use the data for external reporting and analysis.

ROE's, T4's, EFT/Direct Deposit...

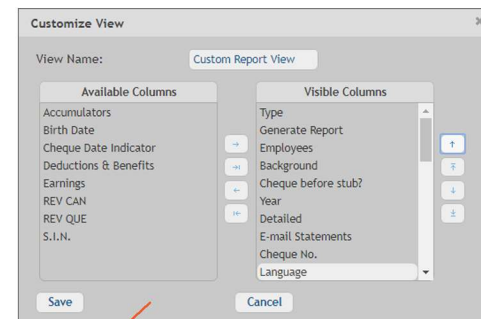

Create employee "Records of Employment" easily so that they can be provided to your departing staff with no delay. Full year-end functions are also provided to produce employee T4 and T4A's.

The Electronic Funds Transfer feature (also referred to as Direct Deposit) allows you pay your employee's electronically by transferring funds directly to their bank accounts.

Customized Views and Reporting

Use the program's unique Customize Views feature to tailor the data display in any order and from any aspect. Show additional columns to drill down for detailed data analysis or hide entire columns to facilitate quicker data entry.

Custom views can be used to produce detailed reports that you can view on the screen or export for external editing.

NETEmployer
Workforce Management

"Each year, CanPay payroll software is used to produce more than 7.5 million pay cheques and EFTs all across Canada."
